

# How to write your own strategies for embedding

## Number

### Instructions

1. Choose one or two items from the box and then add your own context below.
2. Write out a final draft summarising your strategy.
3. If you need to, make any changes to ensure your strategy addresses the number skills you want to concentrate on.

Teach my learners to **use number to solve problems** with a focus on...

<i>how to use additive strategies</i>	<i>and</i>
<i>how to use multiplicative strategies</i>	
<i>how to use proportional reasoning strategies</i>	
<i>strengthening number sequence knowledge</i>	
<i>strengthening place value knowledge</i>	
<i>strengthening number facts knowledge</i>	
<i>in the context of...</i>	

Here's my idea for a strategy for embedding number

Thinking more deeply about your strategy

**Can you provide a breakdown of the specific number skill areas?**

*One area I want to focus on is ...*

*This includes things like ...*

*Another area I intend to include is ...*

*This covers ...*

**What kinds of specific number competencies or practices do you expect to see?**

*What I hope to see is ...*

*Also, I'd like to see more of ...*
