

How to write your own learning outcomes

For Number

Instructions

1. Choose one item from each box and then add your own context.
2. Write out a final draft of the learning outcome below.
3. If you need to, make any changes to ensure your learning outcome is specific to the number skills you want to teach and assess.

Use	strategies to solve addition and subtraction problems
Remember	strategies to multiplication and division problems
Describe	strategies to solve problems involving fractions, decimals and percentages
Discuss	strategies to solve problems involving proportions, ratios, and rates
Apply	number sequence knowledge
Demonstrate how to use	place value knowledge number facts knowledge
in the context of...	

Here's my idea for a number outcome
