
Trifecta AI Suite – Strategic Alignment Memo

AIHOA · ALEC · SCRIBE

Prepared by: Graeme Smith · July 2025

Overview

In response to NZ's new AI strategy *Investing with Confidence*, this memo outlines a **ready-to-deploy suite of three GPTs**—already active, aligned, and delivering.

Each addresses a key sector gap:

Tool	Focus	Strategic Contribution
AIHOA	Educator Capability & Leadership	Builds AI confidence, ethical use, Te Tiriti-aligned engagement
ALEC	Literacy & Numeracy Embedding	Converts TEC frameworks into real-time, lesson-level support
SCRIBE	Data Strategy & Policy Insight	Translates adult literacy data (e.g. PIAAC) into action and equity framing

These GPTs operate independently or together—each is a module in a **culturally grounded, educator-powered AI mesh**.

Strategy Pillar Alignment

- **Responsible Adoption** → All three are Te Tiriti-embedded, privacy-aligned, and grounded in modern neuroscience.
- **Barrier Removal** → No code required; live-tested in real NZ educational settings.
- **Skills Readiness** → Used across Ako Aotearoa, tertiary institutes, literacy workshops, and leadership coaching.
- **Public Sector Use** → Actively supports Tapatoru, compliance evidence, assessment generation.
- **Global Resonance** → Brought to ISTE 2025 with NZ contingent; aligned with ISTE AI frameworks.

Call to Action

This is not theory. These tools are working. Let's move:

- Pilot rollouts with MBIE, TEC, NZQA
- Showcase as part of NZ Government AI exemplars
- Partnership to develop sector-wide AI frameworks
